

Year 5 Homework Term 6

Dear Year 5 Parents,

Home learning is very beneficial to progress in class. Here is a summary of our expectations for each child:

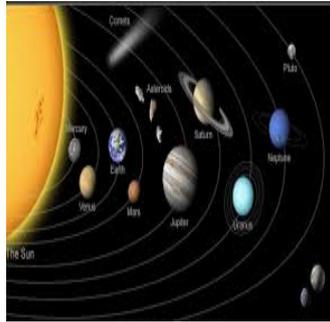

Daily expectation: The children are expected to **read every day for at least twenty minutes** and have their reading record signed by an adult. They also need to **practise their times tables (up to 12 x 12) and spellings on a daily basis**. The children will be expected to bring their Spelling Quiz books into school every Monday for their quiz.

Termly expectation: The children need to **complete one or more of the Space home learning projects** before the last week of Term 6. We will have a showing day during the last week of term where the children can share their project with their peers.

Many thanks,
The Year 5 teaching team

Make

Have a go at making your own model of the Solar System!

Fact book

Create a fact book which will wow any reader! Design a front cover, contents page and a variety of facts. This could be a fun thing to add to each week.

You could include facts about:

- *Planets
- *Astronauts
- *The history of space exploration
- *Rockets

Maths

Create a maths game based around Space. It could involve players needing to try to locate a spaceship or planet (a bit like battleships). It could use your maths skills of co-ordinates and angles.

ICT

Create a PowerPoint presentation about Space. Bring your PowerPoint into school saved on a USB stick and you can share it with your class.

*Create a poster about an astronaut.

Research information about an astronaut. What training do they have? What missions have they been on? What is it like to go to space?

Make

Have a go at making your own model of a Space rocket!

Create a song, poem or play about Space.

Either create a song, poem or play about Space. One way to do this is to find a song or poem you like and try to innovate it, or be daring and create one from scratch.

Write a story about Space

It could be science-fiction/ fantasy or you could be about an astronaut going on an adventure into space!

Art

Draw or paint a picture of an alien!
You could think about what planet it might live on and how it might have adapted to the environment.

Make

Make a space robot like the ones that explore far off planets!

Make

Make a flipbook!
It could be to show an adventure in space or the phases of the moon – use your imagination!

Art

Can you draw/paint a landscape picture of a planet in our solar system or create one yourself? Perhaps you could draw a picture of Outer Space/a star?
